

Which Coating Guide:-

Crystal Serum Ultra or Crystal Serum Light is recommended for application on vehicle paintwork that has a clear coating over the base paint.

C1 Crystal Lacquer is recommended for single stage paints (no clear coat) and clear over base, Matte Paints + Gelcoat and Powder coated surfaces. Our only ceramic coating recommended for Caravans.

EXO can be used as an over coat to all of the above coatings or as a stand alone hydrophobic coating. It is also safe for use with matte & satin paints.

HALO is recommended for both matte and normal PPF.
